Commercial Insurance

We have considerable experience across many different sectors recognising that no two businesses are the same.

Commercial Insurance

We have vast experience working with commercial businesses over the years and with this have gained an understanding of our clients' risk profile/exposures. We design and implement risk & insurance programme solutions that ensure our clients are well protected.

We work closely with specialist insurers by sector so we can offer the most competitively priced premiums and appropriate policy wordings without compromising cover. We back this up with bespoke client service plans.

Our sector Experience includes but is not limited to:

Manufacturing & Engineering	Distribution & Logistics	Retail & Leisure
Technology, Media & Telecoms	Construction & Contractors	Professions
Hospitality & Events	Food & Drink	Motor Trade
Education	Marketing & Communication	Recruitment & Training

We provide a broad range of insurance covers, however it really depends on the risk exposures you face and environment you operate in. We only recommend covers if they are applicable to your business and adequately mitigate the risk you face when there is no other commercial or practical solution to do so.

How we will help you:

- We will take time to review your current insurance programme and to spend time with you to fully understand your business and the risks you face. We can present you with our findings of your existing cover with no obligations
- We will seek the most appropriate policy for you and ensure it meets your requirements with no hidden conditions or clauses
- We deliver competitive premiums focussing on value for money without compromising on cover or service
- We provide outstanding service and will be your contact for all claim related matters to ensure a consistent and speedy resolution
- We will assist with and provide details for property valuations, risk management, health & safety advice and contingency planning
